

## AZOMITE® - Shipping

For shipping internationally, full container loads are the most economical. We are able to ship **AZOMITE®** overseas in three ways:

1. 40-foot (12.19 meters) shipping container with 19.2 metric tons of **AZOMITE®**.
2. 40-foot (12.19 meters) shipping container with 25.2 metric tons of **AZOMITE®**. This is more economical than 19.2 metric tons.
3. 20-foot (6.0 meters) shipping container with 14 metric tons of **AZOMITE®**. Please note that 20-foot containers are more difficult to obtain and shipping will take considerably longer than 40-foot containers.

Within the USA, we are able to ship the above amounts by truck.

Shipping in any amount under 19.2 metric tons **not** via a container can be arranged but will be considerably higher in cost.

For international or domestic shipping prices please [contact us](#).
